

# SINGMODE COMMAND

## WINDOWS 11 DEPLOYMENT GUIDE | V1.0.2

This guide provides step-by-step instructions for deploying **SingMode Command** as a professional karaoke workstation on Windows 11.

### 1. SYSTEM REQUIREMENTS

Component	Minimum	Recommended
Processor	Intel Core i5	Intel Core i7 (12th Gen+)
RAM	8GB	16GB
Wi-Fi	2.4GHz	5GHz (for lowest latency)

### 2. INSTALLATION & SETUP

**01 Environment:** Download and install **Node.js (LTS)** from nodejs.org. Ensure it

matches your Windows arch (x64).

**02 Launch:** Open your SingMode folder, enter the directory, and

double-click .

**03 Installer:** To create a standalone , run . This

creates a native installer for production use.

## | 3. NETWORK CONFIGURATION

For smartphone microphones to function, your PC and guest phones must be on the same network profile.

- Set your Wi-Fi profile to "**Private**" in Windows Settings.
- Configure your **Network IP** in the DJ Console UI to match your local IP (e.g., **192.168.1.100**).
